PREMIUM CONTRACT MEDIA

Validation™ PS Publication

Validation PS Publication Premium Proofing Media is a competitively priced premium proofing media for use with both pigmented and dye-based ink-sets. This media uses an actual publication press stock with a high-quality micro-porous inkjet coating. PS Publication thus offers the exact look and feel of an offset press stock while remaining compatible with all available aqueous inkjet ink sets and demonstrating sufficient gamut to accurately proof commercial, publication and packaging print. Being a true publication stock, PS Publication is an ideal replacement for more expensive direct to substrate proofing systems. *Sample rolls are available upon request.*

Validation Means Green

Validation PS is a paper based media made from sustainable 100% natural resources. PS is both recyclable and bio-degradable using 37% less raw material than a comparable 250 gsm proofing media.*
